Second generation timber farmer Danny Heatherly started BarkClad over 25 years ago in Western North Carolina.

Since then, BarkClad has built a reputation on delivering the highest-quality natural bark siding produced in Western NC and distributed across the United States, providing exceptional customer service every time.

Our Natural bark is cut by hand on site, as well as peeled by hand. Each piece is handled and inspected approximately 8 times.

SmartBark

THE WORLD'S FIRST ENGINEERED BARK SIDING

Our SmartBark comes in a variety of styles and colors to match any project you might have. SmartBark also comes with an exclusive 25-year limited warranty which ensures your SmartBark siding will look beautiful for years to come.

NATURAL BARK

Natural bark siding is hand-peeled, hand-cut on-site, and carefully moved to a pallet where it is placed on slats and stacked for drying. Our 100% Made in the USA Tulip Poplar bark is placed in a certified kiln and dried. Every piece is carefully cut using a special saw and banded on shipping pallets ready for delivery. Each piece of bark is handled 8 times before delivery, creating its custom unique look. We offer interior, exterior, and a super premium grade bark to enhance your custom project needs.

SMARTBARK SIDING

SmartBark saves time and money without sacrificing style. With multiple styles and colors to choose from, our Engineered SmartBark Shingles allows you to create unique and realistic representations of natural bark. Unlike natural bark, SmartBark has no limits on inventory. All SmartBark products are weather resistant, easy to install with our newly designed locking system, and does not require any insect treatments or a moisture barrier. SmartBark is a washable, paintable, and flame resistant siding that has an R value average of 4.7 per inch. To further a unique look for every panel, each piece is faux painted to create an authentic bark resemblance.
